SANS Security Awareness Work-from-Home Deployment Kit

Our office is closed. But we're 100% using Teams to communicate, and to solve issues via screen sharing. Works great.

We've been training people on Teams, OneDrive Since January. It's paying off. I'm able to handle all issues via a chat or a screenshot.

For Client Server applications people use VPN to connect to our servers that are onsite. We're also conducting video meetings via Teams also.

There are some users that didn't attend any meetings, and it's difficult for them to grasp screen share, or to enable video.

Here's a link to short 1-2 minute videos about Teams. It's a Microsoft Production. Very helpful.

No FAQ I can share per se...

But the 'why' behind this social isolation is to avoid burying hospital resources. As it is particularly contagious, airborne, and stays a long time on hard surfaces.

BCP wise, This may be a long road, to avoid burying hospitals, until a vaccine... Apparently this is the study that changed US/UK actions.
